

Persona Two

Project: Automated driving that is aware of blind spots, environmental hazards, and quickest routes that change daily due to traffic and accidents.
Interface that calms user, lessens anxiety and stress about ETA and driving choices.

PHILLIP

BIO

Phillip works in an office in the city and takes taxi/uber transportation to work and home.
His work is located in the central business district in the city with many pedestrians, cyclists, and stopping traffic.

He likes to have a fixed routine and arrive early to work.
His lifestyle is organized and deals with planning large scale projects that take lots of effort and time.
His work is strict but he is rewarded with his timely work ethics.
Phillip is also married, his favorite time of day is when he gets home in time for a lovely home-made dinner.

ABOUT

Gender: Male
Age: 46

OCCUPATION

Full-time Project Manager

GOALS

- Make it to work and home on time every day without stress.
- Feel safe in vehicle, trust in driver to notice surroundings, check blind spots,
- Okay to pay more to be satisfied with results
- No room for trial and error because his work performance will suffer.

FRUSTRATIONS

- Stress about being on time to work and home, there are often delays caused from irresponsible and skill-lacking drivers causing unnecessary traffic or taking traffic heavy routes. Which cost his time and work performance.
- Distrust with drivers causing anxiety as the passenger, no information of drivers history, putting his life in danger.
- Cold dinner and unhappy marriage life when arriving home late.
- Uncertainty about arrival times and safety of transportation.
